1. Conservation of water

a. Describe any water conservation efforts you may have started: \_\_\_\_\_

b. \_\_\_\_\_

c. If credit toward beneficial use of water under claimed pre 1914 appropriative water right for water not used due to a conservation effort is claimed under section 1011 of the Water Code, please show the amounts of water conserved:

19 \_\_\_\_\_ (af/mg) 19 \_\_\_\_\_ (af/mg) 19 \_\_\_\_\_ (af/mg)

2. Water quality and wastewater reclamation

a. Are you now or have you been using reclaimed water from a wastewater treatment facility, desalination facility or water polluted by waste to a degree which unreasonably affects such water for other beneficial uses? YES \_\_\_\_\_ NO \_\_\_\_\_

JAN 26 2000

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statement of Water Division and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

(3) assists the State to determine if additional water is available for future appropriators. (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and record of water use. (1) provides a statement of Water Division and Use must be filed by preparan and per 1914 appropriate water users. The filing of a statement (1) provides a

only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriate rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914, new appropriators have been required to obtain a permit and license from the State.

There are two principal types of surface water rights in California. They are riparian and appropriate rights.

Statement of Water Division and Use  
Information Pertaining to Water Rights in California  
Water Rights for Stockponds Constructed Prior to 1969  
"Appropriation of Water in California"

An appropriate right is required for use of water on nonirrigated land and for storage of water. Generally, appropriative rights may be exercised only when there is a supply not needed by irrigation water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on their riparian land without reservation of the riparian right to the severel parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California, riparian and appropriative rights.

Jan E. Abel  
J. Timothy Campbell  
Larry Wilson

**General Manager  
and Secretary**

C. Charles Evans, P.E.

In response to your request, we are hereby filing the Statements of Water Diversion and Use for the 1993-1995 reporting years. You will find the enclosed following surface water diversion sources in this submittal:

<b>Statement Number</b>	<b>Source Name</b>
S000355	Fox Creek
S000354	Alder Creek
S000351	Jameson Lake
S000352	Doulton Tunnel

It should be noted that the Alder Creek source diverts water directly into Jameson Lake. The Alder Creek diversion was suspended in January 1995 when the diversion inlet structure was partially destroyed by heavy rains. The Jameson Lake diversion, as reported, includes water from the Alder Creek diversion as well as the other direct tributaries to the Lake. Regarding the District's right to divert water from these sources, please refer to our correspondence dated June 29, 1994 to your agency sent along with the 1991 to 1993 statement. The District also wishes to inform you that the completion and favorable ruling of the Jordan water rights lawsuit against the Montecito Water District and the City of Santa Barbara in 1996 upholds the earlier Gin Chow court judgement authorizing the diversion of water from the Santa Ynez River and its tributaries, Fox and Alder Creeks.

The other diversion source requested by your Department, San Ysidro Creek, S000353, is not being submitted and was abandoned many years ago by the District.

If you have any questions regarding the above, please contact me at (805) 969-2271.

Very truly yours,

*C. Charles Evans*

Statements of Water Division and Use  
"Information Pertaining to Water Rights in California"  
"Water Rights for Stockponds Constructed Prior to 1969"  
"Appropriation of Water in California"  
Statements of Water Appropriations

An appropriate right is required for use of water on nonirrigated land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

Riparian rights are used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater. In stream but not share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream without reservation of the riparian right to the severed parcel. Generally, a riparian water user must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian land must be an owner of land bordering a natural lake or stream to take and use water on his riparian land.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several

Statements of water diversion and use must be filed by riparian and pre-1914 appropriative water users. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversion, and (3) assists the State to determine if additional water is available for future appropriators.

An appropriate right is required for use of water on nonriparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. Since 1914 new appropriators have been required to obtain a permit and license from the State.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, or return flows from use of groundwater.

There are two principal types of surface water rights in California. They are riparian and appropriative rights.
